When I asked the 76th General Assembly to create the Illinois Department of Law Enforcement, my intent was that this new police organization on the state level would devote every effort and available resource toward support of local police agencies.

Since the Department's inception in 1970, I have been highly pleased with the manner in which it has accepted that charge. The progress reported to me in this second edition of "Crime in Illinois" illustrates that spirit of service.

The Uniform Crime Reporting System described in this report is a new service provided by the state for municipal and county departments. It is being designed and redesigned to meet their needs, and will continue to be an important management tool for all Illinois police administrators.

As a former local law enforcement official, I am well aware of the need for strong support from cooperating agencies, particularly from state government. The commitment we have made will continue, I am sure, to bring about a higher level of professionalism and capability in law enforcement throughout Illinois.

A handwritten signature in black ink, appearing to read "Richard B. Ogilvie". The signature is fluid and cursive, with a large, stylized 'R' at the beginning.

Richard B. Ogilvie
Governor

Another year of hard work by the Crime Studies Section of the Department's Bureau of Identification has produced significant accomplishment in the area of Uniform Crime Reporting in Illinois. This accomplishment is detailed in the introduction to the statistical summary in this report.

And as I read this account of how we are working to make crime statistics "better," "more useful," and more pertinent to the information needs of local police agencies, I can't help but think of how much we owe to those who pioneered this project when the pages were blank—particularly to the Federal Bureau of Investigation.

It is difficult to think of a single significant innovation in the field of law enforcement information services during the last generation that was not either conceived or first implemented by the FBI. During my career as a police administrator, I have relied heavily on their support. Every Illinois citizen who cares about improved law enforcement capabilities shares a debt of gratitude to Director J. Edgar Hoover and his dedicated staff for their generous contributions toward betterment of police services at all levels of government.

Herbert D. Brown
Director

INTRODUCTION

Background

On September 30, 1971, 144 law enforcement agencies throughout the State voluntarily and successfully completed a three month Test Program of the Illinois-Uniform Crime Reporting System. This was a major milestone in the continuous evolution of crime reporting which began in 1850 with the Census Bureau collecting criminal statistics at the federal level, and perhaps more concretely with the beginning of the founding of the International Association of Chiefs of Police in 1871, with respect to uniform crime reporting. It was in 1871, when a meeting of police officials was held in St. Louis, Missouri, for the purpose of "taking council together to inaugurate and adopt a code of rules and regulations whereby the whole detective force of the country can act in unison for the prevention and detection of crime". The assembled chiefs adopted a resolution as one of its principles, "to procure and digest statistics for the use of police departments". Through a lot of hard work and many conventions the Uniform Crime Reporting System became a reality by 1930. The UCR System was officially turned over to the Federal Bureau of Investigation by the IACP, at the latter's insistence in August, 1930. Since that time the FBI has performed the duties as the clearing house for uniform crime reporting.

In the last several years the FBI has been actively assisting individual states in the development of state-wide UCR Programs compatible with the national system. These statistical programs have been given impetus by developing statewide computerized law enforcement information systems, of which they are an essential part. Through such mandatory state programs more complete and better quality of reporting is envisioned. Likewise, through coordination with state agencies the data is available for use by the State, and the collection machinery to the national agency becomes substantially streamlined.

In 1969, The FBI ceased collection of all data directly from municipalities and counties in New Jersey and Michigan. In California the FBI no longer collects the monthly offenses known reports directly from law enforcement agencies; however, the annual arrest, disposition of persons charged, and law enforcement employee data continue to be collected from the individual agencies. During 1969 and 1970, seven additional states began collecting all UCR data from individual agencies. These states are Kentucky, Rhode Island, Pennsylvania, Minnesota, Nebraska, Florida and Wisconsin. At least 12 additional states have enacted necessary legislation to establish UCR Programs.

In Illinois, the establishment of a uniform crime reporting system was authorized by the 76th General Assembly,

set forth by the Illinois Revised Statutes, Chapter 38, Section 206-8, quoted below:

"206-8. Crime Statistics. par. 8. The Department (The Department of Law Enforcement) shall be a central repository and custodian of crime statistics for the State and it shall have all power incident thereto to carry out the purposes of this Act, including the power to demand and receive cooperation in the submission of crime statistics from all units of government." (page 1707)

The Illinois Bureau of Identification was given the responsibility for system development, implementation and maintenance. The B of I was provided funds by the Illinois Law Enforcement Commission (ILEC) for awarding a contract for systems design, the production of the first annual report entitled, **Crime In Illinois-1969**, and development of staff requirement specifications for implementation and maintenance of the system. This phase of the project was completed October of 1970. Staffing began February 1, 1971. Implementation of the system will be effective January 1, 1972.

I-UCR System Structure

A few changes were made to the Federal program to improve the system. The improvements were made to improve consistency of reporting, elimination of excessive paper work and to integrate the reporting system with the normal reporting requirements of the agency for administrative use. This was the main purpose of the I-UCR pilot test program; to ensure compatibility with the agencies needs without loss of continuity with the Federal system. It should be noted that these changes were made possible because it relates to a state in contrast to the Federal-UCR whereby uniformity must prevail over all 50 States each having variations in laws. These major changes are enumerated below by comparing the I-UCR with the Federal-UCR Program in general.

1. The Federal system requires that offense information be reported monthly covering seven offenses; viz., murder and nonnegligent manslaughter, manslaughter by negligence, forcible rape, robbery, aggravated assault, other assaults, burglary, theft and auto theft. Arrest information is reported annually in 26 crime categories. Consequently, insofar as offenses or crimes known to the police are concerned only 7 categories are accounted for to relate to 26 categories of arrest information. This means that a complete relationship between offenses and arrests by crime classification cannot be established. The police enforce all laws as offenses known to them randomly occur. The I-UCR accounts for all offenses known

to the police in all crime categories. Therefore, a direct match between offenses and arrests will be accounted for.

For example, for Illinois, 1970, there were 260,858 index crimes (murder, forcible rape, robbery, assault, burglary, theft and auto theft) reported to the Federal-UCR as crimes known to the police. Compared to these 7 Index Crimes are 83,419 arrests reported for these same offenses. This amounts to a ratio of approximately 3 to 1. That is, three crimes committed for each arrest. If this ratio held true for the other 19 crime categories as a group there would be about 984,000 additional offenses compared to 328,005 reported arrests for these 19 crime categories. However, since the other 19 offenses are not reported in the UCR there can be no direct measurement of the extent of crime in these categories. The Illinois-Uniform Crime Reporting System will account for all crimes known to the police as reported by all law enforcement agencies as they normally occur and are related to specific State crime codes.

2. All I-UCR's are monthly reports as compared to the Federal-UCR, whereby only 7 offense crime categories are reported and no arrest information by crime classification is reported. The Federal system does require supplementary information regarding the nature of theft, robbery, burglary on a monthly basis. The I-UCR requires offense and arrest, and supplementary data be reported for all crime categories on a monthly basis. A consequence of this is that it removes a heavy statistical load off the law enforcement agencies to compile annual reports. Annual reporting will be accomplished by the I-UCR system. Secondly, reporting all crime activity is normal to police operations. Thirdly, a better track on crime trends by type crime in terms of monthly periods provides a much more current and meaningful portrayal of crime.
3. The I-UCR standardizes all reporting for all categories of crime. That is, sub-categories within a crime classification, like assault by gun, knife, hands, fists, feet, other dangerous weapons, is carried through all offense and arrest reporting, thereby maintaining consistency in reporting. In contrast, the Federal-UCR's sub-categories change report to report with regard to offense and arrest data.
4. Law Enforcement Agencies are provided two alternatives for reporting crime data depending upon the size of the agency and the need for internal administrative information. Set-1 forms take the tally approach the same as the federal system, except that all offenses are accounted for; that is, all offense categories are pre-printed on the forms, providing columns for scoring offenses, arrests and police disposition data in gen-

eral. Set-2, in contrast, is case oriented. That is, as incidents occur and police reports are generated, this information is recorded in summary on the I-UCR Summary of Offenses form. Likewise, arrests that are made are entered by case on the Arrest Summary. This approach is aimed at agencies falling within population groups of 15,000 and below and provides them with administrative reports directly. Agencies above 15,000 population groups would normally select Set-1 based upon activity and degree of sophistication in their administrative systems. Both approaches provide the information needed by the Federal System and the agencies have a choice as to which approach to take.

5. Consistent with the concept of mutual compatibility between the local law enforcement agencies is the production of output reports on a monthly basis at the agency level. Input reports from the agencies will be processed via data processing with subsequent output reports to aid the agencies with administrative information. The reports will reflect crime activity on a monthly basis as well as year to date accumulations for comparisons and subsequent administrative action. Likewise, the reports will be "stacked" or summed to the county level, ILEC Regional level and State Summary in a like manner. These reports will be disseminated to all persons concerned with law enforcement and law enforcement programs. Hence, uniform output reports consistent with uniform input information will aid in unifying law enforcement effort and hopefully contributing to the effectiveness of this effort.

The agencies will no longer be required to compile voluminous annual reports for the Federal-UCR. These reports will be compiled and sent to the Federal-UCR on a monthly basis. Additionally crime information will be current and available to those who need to know without having to wait for annual reports which are six months after the fact.

It should be remembered that these improvements are made possible because it relates to a state and not all 50 states. Translation of the I-UCR to the Federal-UCR is made possible because law enforcement agencies enforce laws and not crime statistical classifications. Hence, when an agency filled out the Federal-UCR's the process of translation from charge to statistical classification for reporting purposes takes place during documentation with respect to case record and then statistical offense classification. Therefore, it can be adduced that consistency with the Federal system can be maintained by translation at the State level and in a more comprehensive and dynamic manner resulting in mutual benefits derived from the system structure.

I-UCR Implementation Program-Program Report

This progress report covers the period February 1, 1971, through September, 1971, and presented in chronological order in accordance with the completion of major segments of the Program.

Staffing the Crime Studies Section began February 1, 1971, and ended September 1, 1971, with the acquisition of the last Crime Studies Analyst. The staff consists of one supervisor, two crime studies analysts, two crime studies field analysts, one statistician and two clerk typists. Deployment and utilization of this manpower is reported with the completed tasks that follows. The overall effectiveness as well as cost effectiveness of this staff cannot be presented here because the Program has not been implemented. However, it is expected that each subsequent annual report contain a section on the Crime Study Section posture beginning with the **1972 Crime In Illinois** annual report.

In the first part of March, 1971, all law enforcement agencies within the State were identified and recorded. According to the Crime Study Section's records there are 809 municipal police departments, 102 sheriff departments and 7 University Police Departments, a total of 918 agencies. Of this total 291 police departments, 61 sheriff departments and 1 university police department, a total of 353 departments, filed crime reports with the FBI in 1970. As a consequence of this information a letter was sent to the head of each agency, containing an announcement of the Program, establishing major task schedule times for the Program, and soliciting copies of their annual 1970 FBI-UCR's or if they didn't report to the FBI-UCR, they were to inform the Crime Studies Section of the number of full-time sworn officers.

Concurrent with this activity was the development of a comprehensive Program Plan which led to the release of a purchase order for printing test forms for trial in the field and the publication of an instruction manual for filling out the I-UCR forms.

On April 15, 1971, the first Crime Studies Bulletin was compiled and sent to all agencies. The Bulletin serves as a communication link between the Crime Studies Section and the various law enforcement agencies, as well as other concerned functions of state government. The status of the Program is provided in each monthly Bulletin along with other informative items.

During May, the Program Plan consisting of system overview, training program and facilities, detail tasks and schedules was finalized, published and sent to all law enforcement agencies on May 28, 1971. A very important segment of this plan was testing the system in the field in conjunction with law enforcement agencies prior to full implementation and start-up on January 1, 1972. Agencies that were asked to participate were selected on the basis of size and location in order to obtain an excellent cross-section of law enforcement agencies throughout the State.

Training sessions were held in Illinois State Police District Headquarters throughout the State. Approximately 196 agencies were selected for participation, which resulted in 144 agencies participating in the three month Test Program. These agencies represented about 6,249,649 people in the test areas or about 57% of the State's population (including Chicago).

The Test Program training session began the second week of June and ended the second week of July, 1971. The law enforcement agencies involved in the three month test filled out the I-UCR forms and forwarded them monthly to the Crime Studies Section. In addition, the agencies also sent any specific recommendations for improvement under the principle that the system should be mutually beneficial to the local agencies as well as the State. Perhaps one of the most important results of the Test Phase was to take the final design of the system to the user and give the proposed system broad and down to earth exposure.

In the first part of September, 1971, the Crime Studies Section and Data Processing of the Department of Law Enforcement began joint efforts in developing I-UCR computer requirement specifications and the forms were analyzed in conjunction with agency suggested changes, redesigned and submitted for printing. At this point the user side of the system was solidified in order to progress with computer applications and computer programming.

It should be noted that during the Test Phase all forms, suggested improvements and program status was conveyed to **all agencies** via the Bulletin and related attachments. Therefore, insofar as the I-UCR Program is concerned all agencies were kept informed and asked to submit their ideas or comments to the Crime Studies Section for action so that the program could be solidified prior to operational status on January 1, 1972. In addition, daily contact with test agencies was maintained as required for direct and prompt support in the field.

I-UCR Program Ahead

Over the next three months (October through December) invitation letters will be sent to all agencies to participate in the thirty scheduled training sessions according to dates and times indicated in the letters. Agencies that cannot be present in the day program will be solicited to come to an evening training session in their locale. All agencies are expected to participate in the I-UCR Program beginning January 1, 1972.

Prior to the beginning of the year an annual supply of forms and instruction manuals will be sent to each agency. In February of 1972, the first monthly reports will be mailed to the agencies along with an agency comparison (participating or not) and the State Summary. Subsequent monthly reports will be the same format excepting the reports will show current month and year to date up to the State level. In this way everyone concerned with law enforcement, law enforcement programs and the like will be kept current on Crime In Illinois in lieu of waiting for an annual report that is six to eight months after the fact.

Consequences of the I-UCR Test Program

As a consequence of testing the I-UCR and subsequent implementation, two major problems were disclosed by the various law enforcement agencies. First, implementation of the I-UCR assumed that all agencies had adequate record systems to meet the uniform requirements of the I-UCR. However, during the Test Phase there arose a need to establish uniform records for uniformly interfacing with State-level systems, State's Attorneys, inter-agency communications and the like, such that the exchange of information is standardized and hence data elements mean the same thing and are adequate and complete in the description of crimes and criminals.

Secondly, it was found that the majority of agencies are not getting court disposition feedback regarding what happens to subjects in the judicial process. This is important to a law enforcement agency in that each agency maintains criminal histories, and secondly they need it for evaluation of case preparation and thirdly, to maintain a criminal tract of recidivists. At the State level criminal histories are maintained for access by the various agencies in the investigative and prosecutive steps of the criminal justice process. These records are not always complete because they lack court disposition information hence the subject's criminal history is incomplete.

Presently, twenty-one law enforcement agencies have agreed to participate in the development of Uniform Police Records, which will be vigorously pursued, based on immediate needs to standardize the "front end" of the Criminal Justice Process. In addition, as part of the Uniform Police Records Study, a Uniform Court Disposition Study was approached through the 102 State's Attorneys to establish a uniform system in connection with Uniform Police Records. These two segments of the Criminal Justice Process in conjunction with the Courts should bring about an organized effort to establish a uniform media for information flow and standardization of the beginning of the Criminal Justice Process. Progress in this area will be reported monthly via the Crime Studies Bulletin.

Crime Classifications: Illinois-Uniform Crime Reports

Crime classifications for the I-UCR have been taken directly from the Illinois Revised Statutes, mainly from Chapter 38. In our discussion of the I-UCR forms we mentioned two alternative methods for reporting crime. Set-1 being similar to the Federal reports, by direct counts of offenses and arrests within crime classification, whereas Set-2 is case oriented and summary information is provided for each offense and each arrest. Since Set-1 is a fixed format of crime classification only a limited number of laws could be represented. However, all crime statistical categories presented by the FBI-UCR system are included with other laws added to satisfy State and Local crime reporting requirements. The concept being to ac-

count for all crimes or in another way offenses and subsequent arrests as related to specific State Statutes.

The following is a list of crime classifications that are used in the I-UCR Program, taken from the Revised Statutes.

OFFENSES	STATUTE
Homicide.....	38-9
Murder	38-9-1
Attempts: Murder	38-8-4
Voluntary Manslaughter	38-9-2
Involuntary Manslaughter and Reckless	
Homicide - Non-Vehicle.....	38-9-3a
Involuntary Manslaughter and Reckless	
Homicide - Vehicle	38-9-3b
Forcible Rape	38-11-1
Attempts: Forcible Rape	38-8-4
Robbery	38-18
Aggravated Battery	38-12-4
Battery (Simple)	38-12-3
Reckless Conduct	38-12-5
Aggravated Assault	38-12-2
Assault (Simple)	38-12-1
Burglary (Except From Auto)	38-19-1
Attempts: Forcible Entry.....	38-8-4
Burglary From Vehicle	38-19-1
Attempts: Burglary From Vehicle	38-8-4
Theft	38-16-1
Over \$150.....	
\$50 to \$150	
\$5 and Over, But Less Than \$50	
Less Than \$5.....	
Attempts: Theft	38-8-4
Auto Theft.....	38-16-1
Attempts: Auto Theft.....	38-8-4
Arson.....	38-20-1
Possession Explosives, Incendiary Devices	38-20-2
Attempts: Arson	38-8-4
Deceptive Practices	38-17-1
Forgery	38-17-3
Fraud.....	38-17-1
Embezzlement.....	38-17-1
Credit Cards	38-17-1
Deceptive Altering of Coins	38-17-4
Attempts: Deception	38-8-4
Stolen Property, Buying, Receiving, Possessing.....	38-16-1(d)
Theft of Labor or Services or Use of Property	38-16-3
Vandalism	38-21-1
Criminal Damage to Property	38-21-3
Criminal Trespass to Land	38-21-4
Criminal Damage to State Supported Property	38-21-5
Criminal Trespass to Vehicle	38-21-2
Deadly Weapons	38-24
Unlawful Use of Weapons.....	38-24-1
Unlawful Sale of Firearms	38-24-3
Unlawful Possession of Firearms and Ammunition	38-24-3.1
Register of Sales by Dealer	38-24-4
Defacing Identification Marks of Firearms	38-24-5
Firearms and Ammunition - No I.D. Card	38-83-2 & 3
Attempts: Firearms and Ammunition	38-8-4
Sex Offenses (Except Forcible Rape)	38-11
Prostitution	38-11-14
Soliciting for a Prostitute	38-11-15
Pandering	38-11-16
Keeping a Place of Prostitution	38-11-17
Patronizing a Prostitute	38-11-18
Pimping.....	38-11-19
Obscenity	38-11-20
Harmful Material.....	38-11-21
Deviate Sexual Conduct	38-11-2
Deviate Sexual Assault	38-11-3
Indecent Liberties With a Child.....	38-11-4
Contributing to Sexual Delinquency of a Child	38-11-5

Indecent Solicitation of a Child	38-11-6
Public Indecency.....	38-11-9
Aggravated Incest	38-11-10
Incest	38-11-11
Attempts: Sex Offenses	38-8-4
Gambling	38-28
Offenses Involving Children	23
Endangering Life or Health	23-2354
Contributing to Delinquency of a Minor	23-2361a
Curfew	23-2371
Run-Aways.....	23-2591
Cannabis Control Act	
Possession of Not More Than 2.5 Grams	
Possession of Over 2.5 Grams, Not Over 10 Grams.....	
Possession of Over 10 Grams, Not Over 30 Grams	
Possession of Over 30, Not Over 500 Grams	
Possession Over 500 Grams—Any Substance	
Casual Delivery	
Under 18—Delivery	
Calculated Cannabis Conspiracy	
Failure to Keep Records	
Other	
Intoxicating Compounds	38-81
Controlled Substances Act	
Manufacture—Intent	
Possessing a Controlled Substance	
Counterfeit Substance—Manufacture or Deliver	
Delivery or Possession Intent to Deliver	
Criminal Drug Conspiracy	
Licensed Operators-Registration	
Delivery to Persons Under 18	
Failure to Keep Records-Operators	
Hypodermic Syringes and Needles Act.....	38-22-50
Failure to Keep Records	38-22-52
Liquor Control Act-Violations	43
Solicitation of Alcoholic Beverages	38-26.1-2
Motor Vehicle Offenses.....	95 1/2
Driving Under the Influence-Alcohol	95 1/2-144
Driving Under the Influence-Drugs	91 1/2-144
Transportation of Alcoholic Liquor.....	95 1/2-144.2
Reckless Driving	95 1/2-145
Drag Racing	95 1/2-145.1
Revoked, Cancelled Registration	95 1/2-3-702
No Drivers License	95 1/2-6A-101
Suspended-Revoked Drivers License	95 1/2-6A-303
Unlawful Use of Drivers License.....	95 1/2-6A-301
Abortion and Related Offenses	38-23

Crime Index Federal-Uniform Crime Reports

The crime index developed by the IACP early in the UCR Program consists of Murder, Forcible Rape, Robbery, Aggravated Assault, Burglary, Larceny \$50 and Over in Value and Auto Theft. These crimes were selected because as a group, they are either serious crimes by their nature or they represent a large volume of offenses that occur.

Offenses of murder, forcible rape, robbery and aggravated assault are categorized as **violent crimes**. Offenses of burglary, larceny \$50 and over and auto theft are classed as **crimes against property**. The Crime Rate is defined as the Crime Index per 100,000 population. The crime index as defined by the Federal-UCR is illustrated below:

Murder	Violent	
	Crimes	
Violent Crimes	Robbery	
	Aggravated Assault	
Crime Index	Property	Burglary
	Crimes	Larceny \$50 and Over
		Auto Theft

Sometimes readers get confused between the Crime Index and Part I Crimes. The terms Part I and Part II classes of offenses appears on the UCR forms. The Part I Classes of offenses includes the Crime Index plus manslaughter by negligence, other assaults and larceny under \$50. Part I crimes are listed below as they appear on the UCR forms;

Part I Crimes

1. Criminal Homicide
 - a. Murder and Nonnegligent Manslaughter
 - b. Manslaughter by Negligence
2. Forcible Rape
 - a. Rape by Force
 - b. Assault to Rape
3. Robbery
 - a. Armed-Any Weapon
 - b. Strong-Arm-No Weapon
4. Assault
 - a. Gun
 - b. Knife
 - c. Other Dangerous Weapons
 - d. Hands, Fists, Feet, Etc.-Aggravated
 - e. Other Assaults-Not Aggravated
5. Burglary
 - a. Forcible Entry
 - b. Unlawful Entry-No Force
 - c. Attempted Forcible Entry
6. Larceny-Theft
 - a. \$50 and Over
 - b. Under \$50
7. Auto Theft

1.b., 4.e., and 6.b. are omitted when computing the Crime Index. Offenses known to the police are scored in accordance with the most serious crime, i.e., the way they are listed above. Offense data for these statistical classifi-

cations are reported monthly. Arrest data related to these classifications are reported annually.

Victimization

It should be understood that the statistical information presented herein represents offenses known to the police and does not reflect the actual number of crimes that occurred in the reporting period. Many crimes occur which are not reported to the police for one reason or another. Crimes reported to prosecutors usually do not show up in the police statistics. And citizens often do not report crimes to the police.

Since better crime prevention and control programs depend upon a full and accurate knowledge of the amount of crime, the President's Commission on Law Enforcement and Administration of Justice, initiated the first national survey ever made of crime victimization. The National Opinion Research Center of the University of Chicago surveyed 10,000 households, asking whether the person questioned, or any member of his or her household, had been a victim of crime during the past year, whether the crime had been reported and, if not, the reasons for not reporting. More detailed surveys were undertaken in a number of high and medium crime rate precincts of Washington, Chicago and Boston by the Bureau of Social Science Research of Washington, D.C., and the Survey Research Center of the University of Michigan. All of the surveys dealt primarily with households or individuals, although some data was obtained for certain kinds of businesses and other organizations.

These surveys show that the actual amount of crime in the United States today is several times that reported in the Federal-UCR. The amount of personal injury crime reported to the National Opinion Research Center is almost twice the UCR rate for individuals. Forcible rapes were more than 3-1/2 times the reported rate, burglaries three times, aggravated assaults and larcenies of \$50 and over more than double, and robbery 50 percent greater than the reported rate. Only vehicle theft was lower and then by a small amount.

In view of the above, the best source for obtaining crime data is from crimes known to the police. The crimes used in the crime index (murders and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny \$50 and over and auto theft) are those considered to be the most consistently reported to police and the computations of crime trends and crime rates are prepared using offenses reported to the police.

Criminal Justice Expenditure and Employment Data: 1968-69, U.S. Department of Justice, Law Enforcement Assistance Administration

The Federal Government spent \$828.9 million for activities of the criminal justice system in fiscal year 1968-69. That amount was less than 0.6 percent of the 1969 Federal

general expenditure (excluding education) of \$150.7 billion. About \$491.6 million was spent for law enforcement activities; \$105.5 million for judicial activities; \$91.5 million for prosecution; \$39.8 million for indigent defense; \$71.3 million for correction; and \$29.2 million for other criminal justice activities, mainly the program of the Law Enforcement Assistance Administration.

Total Federal employment on a full-time equivalent basis in October, 1969, was 2,875,000. Of that number 55,485 worked in criminal justice activities: 35,634 in law enforcement; 6,670 in the judiciary; 5,796 in prosecution; 1,800 in indigent defense, 5,388 in correction; and 197 in other criminal justice activities, mainly the Law Enforcement Assistance Administration.

State Governments

State government general expenditure, excluding education, totaled \$40.8 billion in fiscal year 1968-69. About \$1.9 billion, or 4.6 percent of that sum, went for criminal justice activities, consisting of 1.5 percent for police protection, 0.6 percent for judicial activities, 0.2 percent for prosecution and indigent defense, and 2.3 percent for correctional activities. The relative weights of expenditure for the component parts of the system varied considerably from State to State, but consistently showed the largest expenditure for correction and the least for prosecution and indigent defense activities.

In per capita terms, the States spent \$9.42 per person for criminal justice activities, consisting of \$3.09 for police protection, \$1.17 for judicial activities, \$.39 for prosecution and indigent defense activities, and \$4.77 for correction.

At the State level, judicial expenditure is primarily for major trial courts. In the aggregate, States spent \$113 million for major trial courts as compared with nearly \$23 million for courts of last resort, \$19 million for intermediate appellate courts, \$40 million for various other courts, and approximately \$35 million for a variety of judicial support activites.

The greatest proportion of correction expenditure at the State level was for the operation of correctional institutions. In the aggregate, States spent \$959 million for correction, of which \$695 million, or 72.4 percent, went for the operation of institutions; \$79 million for probation, parole, and pardon activities; and \$30 million for administration. Intergovernmental payments for such activities as the transportation and boarding of prisoners by other governments, and the distribution of LEAA grant funds amounted to \$45 million. Capital outlay and miscellaneous activities accounted for the remaining \$110 million.

State governments employed a full-time equivalent number of workers totaling slightly more than 1.4 million persons (1,432,888 exclusive of education employees) in October, 1969. Of that number 160,339, or 7.4 percent, were engaged in criminal justice activities; 53,746, or 2.5 percent, worked in police protection; 15,576, or

0.7 percent, were engaged in judicial activities; 6,377, or 0.3 percent, worked in prosecution and indigent defense activities; and 84,640, or 3.9 percent, were engaged in correctional activities.

State payrolls for criminal justice activities totaled \$116 million in October, 1969. Estimates based on October, 1969, data indicate that more than 73 percent of the total annual State expenditure of \$1.9 billion for all criminal justice activities went for salaries and wages. State government police protection payrolls for October, 1969, totaled slightly more than \$38 million. Judicial employees received more than \$15 million; prosecution and indigent defense employees earned nearly \$6 million; and correction employees were paid more than \$56 million.

Local Government

Local government general expenditure, excluding education, totaled \$39.1 billion in fiscal year 1968-69. About \$4.7 billion, or 11.8 percent of that sum, went for criminal justice activities. About \$3.3 billion, or 8.4 percent, was spent for police protection; \$660 million, or 1.7 percent, went for judicial activities; \$207 million, or 0.5 percent, was spent for prosecution; \$30 million, or 0.1 percent, was spent for defense of the indigent; and \$477 million, or 1.2 percent, went for correction.

State to State variation was also found in the relative expenditures by the two levels of government. Local governments accounted for 75 percent of the total State and Local expenditures in the 13 States with the 15 largest SMSA's and only 61 percent of the expenditures in the remaining 37 States.

In per capita terms, the local governments spent \$23.33 per person for the five parts of the criminal justice system. This consists of \$16.49 for police protection; \$3.28 for judicial activities; \$1.03 for prosecution; \$0.15 for indigent defense; and \$2.37 for correction.

Local governments employed a full-time equivalent number of workers totaling slightly more than 2.6 million (2,664,075) workers, excluding those engaged in education, in October, 1969. Of the number 513,337, or 19.3 percent, were employed in the criminal justice system; 377,227, or 14.2 percent, performed police protection duties; 63,736, or 2.4 percent, were engaged in judicial activities; 21,797, or 0.8 percent, work in prosecutorial activities; 2,099, or 0.1 percent, provided defense services to the indigent; and 48,478, or 1.8 percent, were engaged in correctional activities.

Local government payrolls for criminal justice system employees totals \$341.5 million in October, 1969. Annual payroll extrapolations from these October data indicate that slightly more than 87 percent of the total annual local expenditure of \$4.7 billion for all criminal justice activities was expended for salaries and wages. Local government police protection payrolls in October, 1969, totaled \$253.3 million. Judicial employees earned \$41.5 million; prosecution employees were paid \$14.7 million;

indigent defense employees earned \$1.5 million; and correctional employees were paid \$30.2 million.

The data presented for local governments are based on estimates derived from a mail canvass survey of a stratified random sample of 6,200 local governments. The survey responses were checked for completeness and accuracy by a series of edit procedures, and by reference to available budget and audit documents. The expenditure data presented for selected large counties and cities included in the survey design with certainty were obtained by trained field representatives and were inserted into the sample frame.

The total direct expenditure in Illinois, State and Local governments for all functions of the Criminal Justice System amounted to \$372,148,000 and 5.8% of the national total. Illinois expenditures for this period were \$90,848,000, local governments \$281,300,000 representing 24.4% and 75.6% respectively of the State and Local Governments total. The breakdown by function at the State level consisted of \$23,977,000 or 26.4% for police protection, \$16,936,000 for judicial or 18.6%, prosecution \$3,280,000 or 3.6% and correctional \$46,653,000 or 51.4%, for a total of \$90,838,000. At the local levels the \$281,300,000 amounted to 75.6% of the State and Local Government total. Functionally; \$221,228,000 for police protection or 78.6%, \$34,204,000 or 12.2%, for judicial, prosecution, \$11,084,000 or 3.9%, indigent defense \$1,568,000 or 0.6% and correctional \$13,216,000 or 4.7%.

Crime Factors

The factors which influence crime rates are dependent upon many characteristics of the community and, therefore, when attempting to interpret the crime statistics presented herein one should be aware of the social structure and the factors that lead to or cause criminal behaviour.

The law enforcement community can only deal with those factors under its control, whereas, other agencies must deal with the entire problem of contributing factors which lead to crime. The factors below are taken from the FBI annual report—CRIME IN THE UNITED STATES.

1. Density and size of the community population and the metropolitan area of which it is a part.
2. Composition of the population with reference particularly to age, sex and race.
3. Economic status and mores of the population.
4. Relative stability of population, including commuters, seasonal and other transient types.
5. Climate, including seasonal weather conditions.
6. Educational, recreational, and religious characteristics.
7. Effective strength of the police force.

8. Standards governing appointments to the police force.
 9. Policies of the prosecuting officials and the courts.
 10. Attitude of the public toward law enforcement problems.
 11. The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.
-

The reader should be aware of these factors when comparing one community with another to avoid coming to erroneous conclusions.

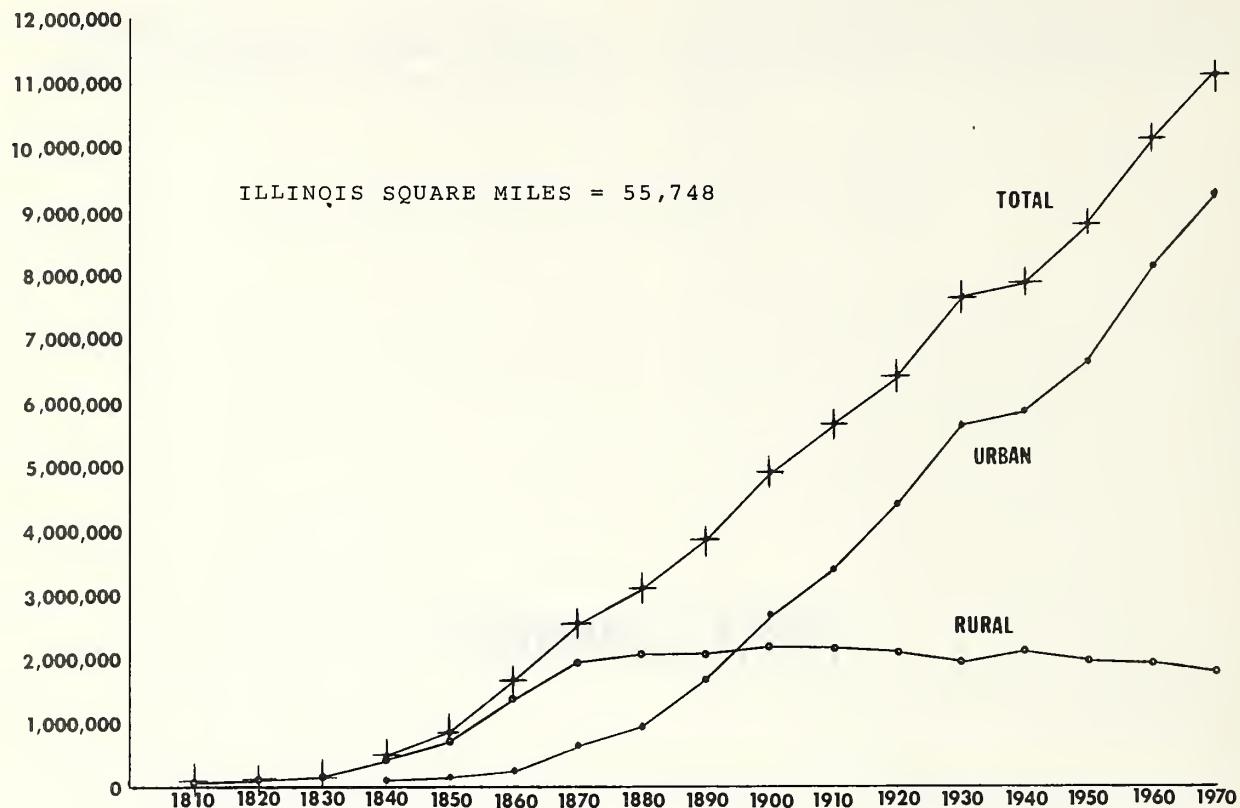

Crime in Illinois—1970

Like the report for 1969, this report presents data submitted to the FBI-UCR during 1970, by contributing agencies. In other words data via the I-UCR will not be available until 1972. Consequently for 1970, as well as 1971, the annual report will have to rely on the Federal-Uniform Crime Reports.

STATE SUMMARY

Illinois Population Trends

1810-1970

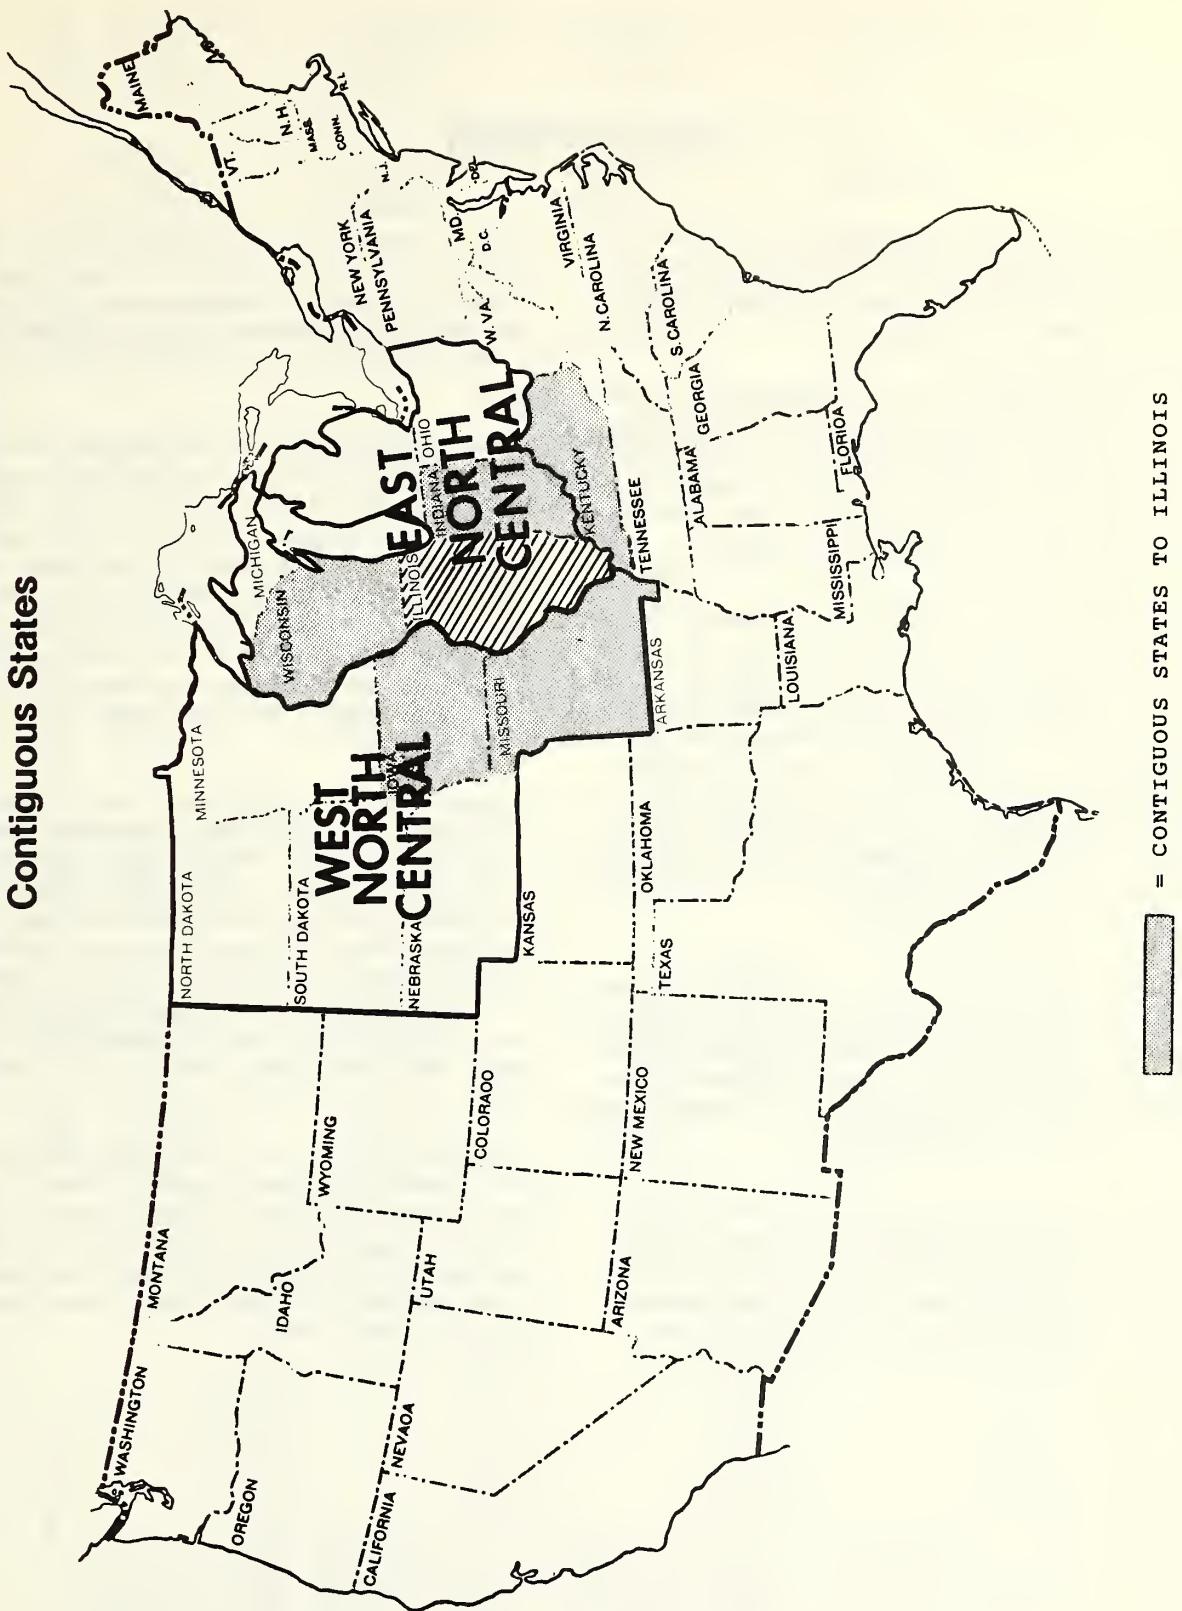

YEAR	URBAN	RURAL	TOTAL
1810		12,282	12,282
1820		55,211	55,211
1830		157,445	157,445
1840	9,524	466,659	476,183
1850	64,712	786,758	851,470
1860	244,809	1,467,142	1,711,951
1870	596,874	1,943,016	2,539,891
1880	941,829	2,136,042	3,077,871
1890	1,718,032	2,108,320	3,826,352
1900	2,618,101	2,203,448	4,821,550
1910	3,479,011	2,159,580	5,638,591
1920	4,403,505	2,081,775	6,485,280
1930	5,639,053	1,991,601	7,630,654
1940	5,812,369	2,084,872	7,897,241
1950	6,760,649	1,951,527	8,712,176
1960	8,135,495	1,945,663	10,081,158
1970	9,229,821	1,884,155	11,113,976

FIGURE 2

STATE SUMMARY

This section of **Crime In Illinois-1970** presents crime statistical data at the State level in comparison with the United States, North Central Region and East North Central Region of the United States.

The North Central Region of the United States consists of; North Dakota, South Dakota, Nebraska, Kansas, Minnesota, Iowa, Missouri, Wisconsin, Illinois, Indiana, Ohio and Michigan. The East North Central Region consists of; Wisconsin, Michigan, Illinois, Indiana and Ohio. The other seven states form the West North Central Region.

The twelve-state North Central Region represents a population segment of 56,577,067 people or approximately 28% of the U.S. population and 24.4% of the U.S. Crime Index (murder, rape, robbery, assault, burglary, larceny \$50 and over and auto theft). The five-state East North Central Region of which Illinois is part of represents a population segment of 40,252,678 people or approximately 20% of the U.S. total and 71% of the North Central Region total. The East North Central Region also represents approximately 18% of the total U.S. Crime Index and 75% of the total North Central Crime Index.

Illinois represents a population of 11,113,976 people or approximately 5% of the U.S. total, 20% of the North Central Region and 28% of the five-state East North Central Region. Illinois Index Crimes consists of approximately 5% of the U.S. total, 19% of the North Central Region and 25% of the East North Central Region.

Contiguous states consist of; Wisconsin, Iowa, Missouri, Kentucky and Indiana representing a population group of 31,447,329 including Illinois or 15.5% of the U.S. total. 35% of the population resides in Illinois and represents 38.5% of the total Crime Index of the contiguous states.

Figure 1, depicts Illinois population trends since 1810. Note the break on urban versus rural level off at the 1870 U.S. Census. However, the table shows continuous urban population growth, whereas, rural population fluctuated slightly around 1940 then continues a slow trend downward.

Figure 2, depicts the North Central Region, East and West North Central sub-regions and the contiguous states. Table 1 provides a top level crime trend over the last six years for each region compared to Illinois. Table 2, focuses down one level depicting the states within the regions, showing 1970 Index Crimes, crime rates and highest in the group. Table 3, portrays crime trends comparing Illinois to the East North Central Region. And lastly, Table 4, depicts the contiguous states, showing index crimes and related crime rates state by state comparisons.

Focusing down to another level, Table 5, portrays the Crime Index for 1970, of the **Standard Metropolitan Statistical Areas** (SMSA). Highest crime rates have been flagged out. Note that the St. Louis and Davenport-Rock Island SMSA's overlap state boundaries. Also, note that the Peoria SMSA has a higher property, aggravated assault, burglary and larceny \$50 and over crime rate than the Chicago SMSA. Figure 3, depicts the SMSA's. Perhaps a different picture would be shown if the Gary-Hammond, Indiana metropolitan area was a part of the Chicago SMSA.

Taking the reported crime index offenses down one more level provides additional visibility. Table 6, portrays cities and towns 25,000 and over ranked by population group with flags on the top ten highest crime rates in ascending order. One should not jump to conclusions here in that the SMSA's perhaps shows a more realistic portrayal of crime by area.

United States—North Central Region—Illinois Comparative Analysis

AREA POPULATION	TOTAL CRIME INDEX	CRIMES AGAINST PERSONS		CRIMES AGAINST PROPERTY		MURDER AND NONNEGLIGENT MANSLAUGHTER		FORCIBLE RAPE		ROBBERY		AGGRAVATED ASSAULT		BURGLARY		LARCENY \$50 AND OVER		AUTO THEFT

NOTE - Crime Rates = Index Crime per 100,000 Population

TABLE 6

CRIME TRENDS

This section of the State Summary contains a series of charts that shows index crime trends comparing Illinois with the United States, North Central Region and East North Central Region. Detail tables have been associated with the graphs to give a composite presentation of the subject matter without having to dig through tabular data. 1965 is considered the base year, therefore, all percent changes for succeeding years are calculated using 1965 as a base. Since the charts are self-explanatory, no further discussion will be presented.

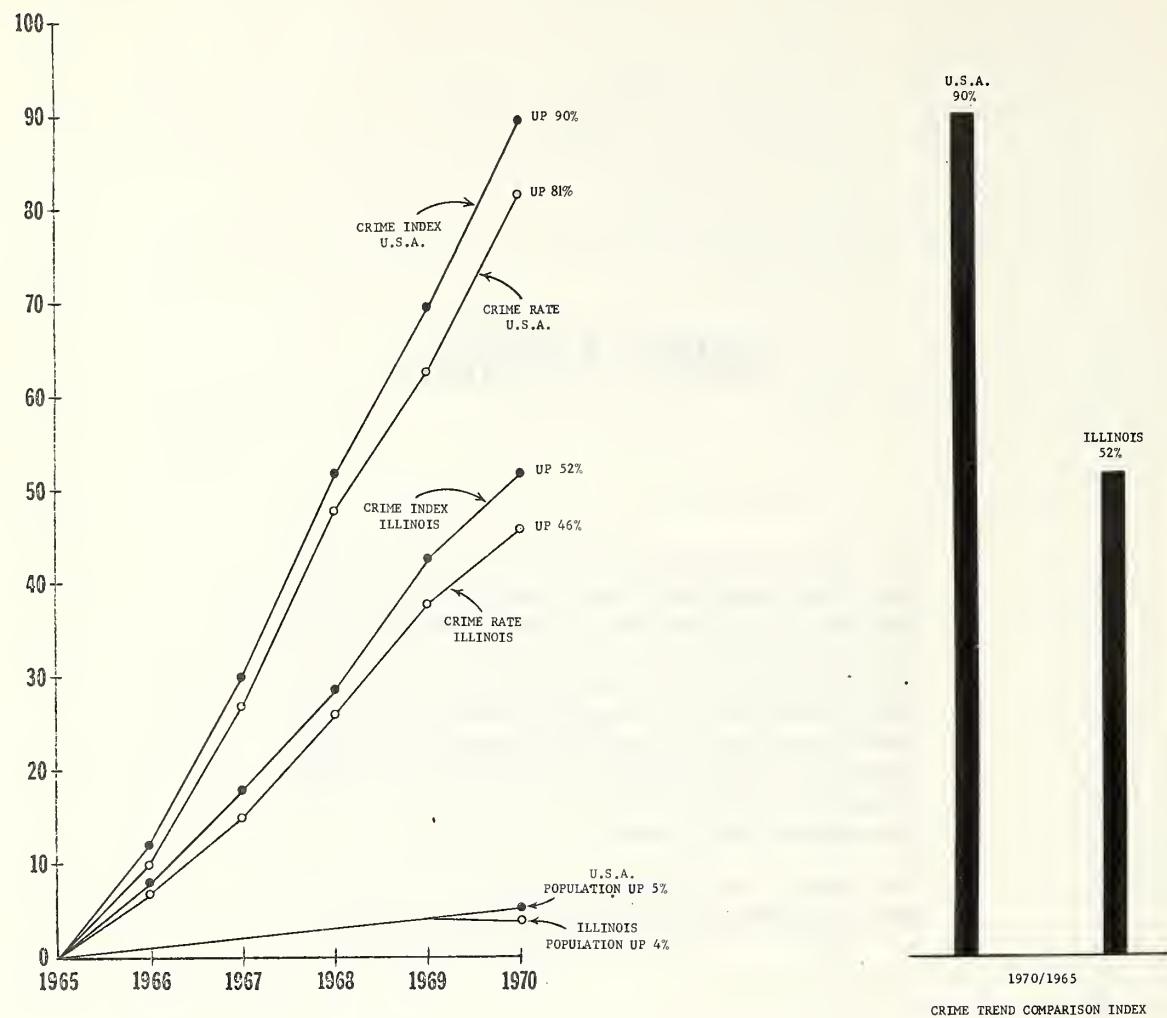

The source of all information provided in this report is from contributing agencies to the Federal-UCR system.

ARREST INFORMATION

ARREST INFORMATION

Law Enforcement Agencies contribute arrest information to the Federal-UCR Program annually and includes all 26 categories of crime one of which is All Other Offenses (except traffic). Since the All Other category of crime ranks fourth relative to frequency of occurrence, (see Table 8) then an explanation of what it consists of is warranted. The All Other crime category contains all arrest information for which there isn't a crime category; for example, abduction and compelling to marry, abortion, admitting minors to improper places, assisting another in the commission of self-murder, bastardy and concealing death of a bastard, bigamy and polygamy, blackmail and extortion, bribery, combination in restraint of trade, trusts, monopolies, contempt of court, criminal anarchism, criminal syndicalism, discrimination-unfair competition, displaying red or black flag, kidnaping, marriage within prohibited degrees, miscegenation, offenses contributing to juvenile delinquency, perjury and subornation of perjury, possession, repair, manufacture, etc. of burglar's tools, possession or sale of obscene literature-pictures, public nuisance, riot and rout, etc. In other words All Other Offenses are included.

These data are collected by Age, Sex and Race within the twenty-six categories. Arrest information by political sub-divisions within the State are not available from the system. Therefore, the following tables and graphs portray the state level summary information only.

Table 8, portrays the various crime categories ranked by frequency of occurrence for 1965 and 1970. The purpose here is to show the relative activity in each category in descending order and the shift in arrest activity between 1965 and 1970.

For example, Narcotic Drug Law arrests shifted from position 20 in 1965 to position 7 in 1970. Disorderly conduct arrests remained as the highest activity, whereas drunkenness dropped from number 2 in 1965 to number 3 in

1970 overtaken by the volume in the Larceny-Theft category. Weapons, carrying, possession, etc., jumped from position 15 in 1965 to 11 in 1970.

To make an arrest and process the subject takes time. Taking this point of view, a sample survey by the Crime Studies Section indicated conservatively about one hour of an officer's time is involved—not considering the desk sergeant's time, records, finger printing, etc. for arrests on Drunkenness and Disorderly Conduct. Looking at the list of arrests in terms of manhours, note the amount of time spent on Disorderly Conduct, Drunkenness, Run-Aways and Vandalism if we assume at least one hour per arrest of an officer's time.

In the introduction it was mentioned that offense information is not collected for all 26 categories only the Part I Crimes, 7 in all. The ratio of offenses known to the police in the Part I crime category is about 3 to 1. The activity not shown in these statistics for 19 crime categories is offense information which would be sizeable if the 3 to 1 ratio held. Therefore, a complete picture of the extent of crime is not known as well as the volume of activity effecting police workload is not reflected.

The I-UCR Program has been designed to correct this situation, whereby, the volume of offenses and related arrests are measured by specific State and Local laws.

The following sequence of charts depicts the offense and arrest relationship and trends for the top 7 offenses. Again, tables of data are associated with graphs and shouldn't require additional explanation.

Back up tables for all categories of offenses and their respective arrest volumes follow the charts. These tables are organized by age groups, sex and race. This concludes the State Summary Section of this report.

ARRESTS RANKED BY FREQUENCY
1965-1970 COMPARISON
ARRESTS 1970

ARRESTS - 1965

<u>TOTAL</u>	354,728	<u>TOTAL</u>	411,700

TABLE 22

ILEC

(ILLINOIS LAW ENFORCEMENT COMMISSION)

REGIONAL SUMMARY & COUNTY OFFENSE DATA

The following section consists of offense data in the seven categories of Part I Crimes; namely, murder and non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny over \$50 and auto theft. These data are detailed down to the county level showing crime index volumes and crime rates summarized from the county level to the 22 planning regions.

The information presented was supplied by the FBI from UCR returns from agencies within the State. In some cases there are law enforcement agencies within the State that did not submit UCR returns and consequently had to be estimated either from prior years or areas of a similar nature. However, the information contained herein is approximately 97 percent complete and a good representation of the State.

The section is divided into three parts; namely, Regional Offenses Analysis, Regional Summary and Regional Groupings of Counties followed by an alphabetical listing of counties and crime index data for easy reference.

CRIME RATE-CRIME INDEX PER 100,000 POPULATION

CRIME INDEX-Murder & Nonnegligent Manslaughter, Rape, Robbery, Aggravated Assault, Burglary, Larceny \$50 and Over, Auto Theft.

TABLE 27 (Cont.)

LAW ENFORCEMENT INFORMATION

This section contains lists of law enforcement agencies and related data regarding manpower, jurisdictional area and other data that is useful in describing the agencies. The tables are ordered by population for comparative analysis. Some of the manpower figures may be off slightly due to the transition of converting to the I-UCR on January 1, 1972. However, these data will be updated and kept current as part of the reporting procedure of the I-UCR.
